

“Crafting the Future” European Observatory

A dynamic, pan-European strategic tool designed to support Policy Makers in strengthening the Arts & Crafts sector. The “Crafting the Future” Observatory is a vital digital knowledge hub designed to provide:

By providing structured, up-to-date information, the **“Crafting the Future” European Observatory** enables Policy Makers to develop effective policies that support sector transformation and growth, aligned with broader European policy objectives, as it offers:

- ✓ **Key Developments Analysis:** Monitoring and analysis of the evolving craft sector in response to societal, environmental, and technological changes.
- ✓ **Skills and Training Guidance:** Insights into emerging skills and skills gaps, informing the alignment of vocational education and training (VET) with labour market needs.
- ✓ **Innovation and Sustainability Strategies:** A database of innovative practices and business models that promote digitalisation, sustainability, and resilience in the craft sector.
